

MTH 1020 Week 3 tutorial

1. There are **two handouts**: the problem sheet and a sheet of helpful advice. There are whiteboard markers & erasers in the box.
2. Get into groups of 3-4 people who all prepared a different question in advance
3. Write your **preferred name** and **ID number** on the whiteboards so I can take attendance
4. Present your prepared question to each other as I come around, you should only take about 5min each for this.
5. Then get started on the other questions **in your groups**.
6. **At the end**: please erase the boards and return any markers etc that you used (you do not need to return the handouts)
